ARTISTIC VISION

Guillermo Laporta is a multidisciplinary artist whose practice presents innovative connections between music, theater, dance, and video. Central to his work is the concept of the *visual concert*—immersive multimedia performances that weave visual art and theatrical design into live classical and contemporary chamber music. These productions have earned recognition for creating "a wholly authentic, visually and aurally compelling experience" (Broadway World) and "a full scale set design and a unique visual approach" (I Care if You Listen).
